1 Overview

Woodside's Contractor Verification Service (CVS) is integral to keeping our people safe by ensuring that our contractors are appropriately qualified for the work they perform on site.

This service ensures the verification of the required qualifications and relevant Woodside eLearning courses (including Site Inductions) is completed for all contractors who perform work on Woodside operating facilities. This service is provided by MyPass Global.

Contractors typically have requirements to hold current qualifications, certificates, licences, inductions, or other training certificates, including the following types:

- Site Inductions
- Australian Maritime Safety Authority (AMSA) Certificate of Medical Fitness and Fitness for Work (FFW) Medicals
- Certificates required for certain classifications required by law or regulation
- Certificates for completion of Basic Offshore Survival and Emergency Training
- Maritime Security Identification Card (MSIC)
- Driver's Licences.

Travel for contractors not registered in the CVS system will not be permitted until registration is complete in MyPass and all relevant qualifications have been verified. Contractors should have a worker passport in MyPass with 100% compliance for the most appropriate position at least 28 days prior to mobilising to site, to ensure the appropriate travel and site access approvals can be confirmed. All eLearning is to be completed at least ten days prior to mobilising to site to allow for air check if travelling offshore. For onshore or no travel, the eLearning is to be completed at least 72 hours prior to accessing site.

All qualifications relevant to the planned scope of work are required to be uploaded into the CVS system.

For more information on CVS requirements, see the <u>Site Access and Contractor Verification</u> SharePoint site.

1.1 Additional Documentation

This document should be read in conjunction with the <u>CVS End to End Process Overview Pack</u>.

2 Mandatory Qualifications

2.1 Mandatory Requirements for <u>all</u> Roles

All roles in CVS, in addition to the qualifications listed in the remainder of this document, are required to provide valid:

- photo identification, either in the form of a driver's licence or a passport
- Industry Safety Induction (ISI). Refer to the <u>Industry Safety Induction</u> for more information. This is not a requirement for King Bay Supply Facility (KBSF) or the Pluto LNG Plant (PLP) Project.

2.2 Mandatory Requirements for Offshore Facilities

All roles for the Offshore Facilities, in addition to the qualifications listed in the remainder of this document, are required to provide valid:

• Maritime Security Identification Card (MSIC).

- Tropical Basic Offshore Survival and Emergency Response Training (TBOSIET), or Offshore Petroleum Industry Training Organisation (OPITO) equivalent.
- Compressed Air Emergency Breathing System Training (CA-EBS) to Offshore Petroleum Industry Training Organisation (OPITO) standard.
- Certificate of medical fitness indicating that the worker is fit to work in offshore or remote locations. (Australian Maritime Safety Authority (AMSA) Certificate of Medical Fitness is recommended for those performing work on a floating production storage and offloading (FPSO) unit.)

These are the minimum requirements for travelling to any of Woodside offshore facilities. If personnel do not meet these requirements, they may apply for a dispensation request via their company focal point.

3 Position and Qualification Requirements

All workers are required to be registered for at least one Access to Site Position **and** at least one Discipline Specific Position in the CVS system to be considered compliant.

Table 1 outlines the Access to Site positions within the CVS system and the minimum requirements that need to be completed to be able to successfully achieve **100% compliance status**. It is expected that the relevant Access to Site position for the planned work location is selected.

Table 2 outlines the discipline-specific positions within the CVS system and the minimum requirements that need to be provided to be able to successfully achieve **100% compliance status**. It is expected that the most applicable position for the planned work is selected. Someone who selects a lesser role to get around role requirements is in breach of business rules and may be demobilised from site.

Table 3 summarises the discipline-specific eLearning requirements applicable to the relevant positions within the CVS system, which need to be completed prior to mobilising to site.

Once the qualifications have been uploaded under the worker's passport and their profile linked to a Woodside Skills Matrix position, the percentage compliance will be seen. Qualifications are compliant when they are 100%. If for any reason the items provided are not able to be verified, the qualification will be rejected back to the worker, for them to amend to align with the Woodside Requirement. The relevant eLearning courses can only be seen by the worker once they have been assigned the position.

Although the below requirements are mandatory, it is expected that any qualifications that are required for the planned scope of work are uploaded into MyPass prior to mobilising to site. Section 2 lists the travel-related qualification requirements for all positions travelling to the offshore facilities and mandatory requirements for all profiles, regardless of role selection.

If it is agreed that the minimum qualification set by Woodside is not required for the work scope, and the contractor meets the necessary criteria to be able to competently and safely perform the planned work, the Woodside Job Owner is required to apply to the Woodside Responsible Person for a <u>CVS/VPOB Certification Dispensation Request</u> (DRF) form for approval.

Some international or older qualifications may also require the <u>CVS/VPOB Certification Dispensation</u> <u>Request</u> form to be completed if they cannot be aligned to a current Australian or Woodside standard qualification. This process is covered in detail in the <u>Certification Dispensation Request Form QRG</u>.

DEFINITIONS

Term	Meaning
MyPass	Digital platform for Woodside's Contractor Verification Service (CVS) for Service Provider Personnel Qualification Management/Compliance. Support for this system can be accessed via MyPass Support email: support@mypassglobal.com
Qualifications	Collective term referring to any qualifications, certificates, licences or other training certificates a contractor may require to perform work on a Woodside facility.
Responsible Person	Woodside OIM (Offshore Installation Manager), OS (Operations Superintendent), MS (Maintenance Superintendent), OTL (Operations Team Leader), MTL (Maintenance Team Leader) for the facilities. Listed on the Approver List for Certification Dispensation Requests.
Job Owner	The Woodside individual responsible for requesting the resource(s) to execute a specific scope of work on a Woodside managed facility under a Woodside Purchase Order (PO) / Contract.
eLearning	Online learning course. Contractors complete Woodside Production eLearning courses via MyPass Portal after being assigned the relevant role by their Contracting Company in MyPass. Elearning requirements are defined as either Access to Site or Discipline specific.

APPENDIX A COMMON ADDITIONAL QUALIFICATIONS REQUIRED

The following table lists some of the common qualifications that may be required in addition to minimum mandatory qualifications listed in Section 3.

All qualifications that are relevant to the planned scope of work are required to be uploaded into the CVS system, MyPass prior to the contractor mobilising to a Woodside operating facility.

This list is only intended to provide an example of some of the work environment specific additional qualifications that may be required to be provided:

- All personnel using equipment that require licences such as (not limited to) scaffolding work, rigging work, operation of boom type elevating work platforms or forklifts are required to provide the relevant High-Risk Work Licence and accompanying verification of competency (VOC) assessment.
- All personnel who are required to use a Personal Gas Monitoring (PGM) device while on site are required to provide Gas Test Atmospheres (MSMWHS217).
- All personnel working at heights, supervising, approving, using or wearing, fitting, selecting and inspecting fall protection equipment are required to provide Work Safely at Heights (RIIWHS204D).
- All personnel with activities associated with entering and supporting a Confined Space as part
 of a work team are required to provide Enter and Work in Confined Space (RIIWHS202D) or
 Enter Confined Space (MSMPER205).
- All personnel with activities associated with entering and supporting a Confined Space as part of a work team that are required to use Breathing Apparatus are required to provide Operate Breathing Apparatus (MSMWHS216).
- All personnel with activities associated with rope access or the use of rope systems to ascend, descend, and traverse at height are required to provide the applicable IRATA certification.
- All personnel associated with Woodside's permit to work system, ISSoW, are required to provide the relevant current ISSoW statement of completion certificate appropriate to the role they are fulfilling while on the facility.
- All personnel associated with specialist activities relating to the Original Equipment Manufacturer (OEM) may provide any product- or service-specific certifications under the OEM Authorised qualification in MyPass.
- Common additional qualifications that may be required are listed in Table 4.

Table 4: Additional qualifications

Common additional qualifications
Driver's Licence
Enter Confined Space
Gas Test Atmosphere
High Risk Work Licence
(Note: A valid Woodside Verification of Competency VOC is also to be provided)
IRATA Certification Rope Access Level 1, 2 or 3
ISSoW – Electrical Isolation Authority (EIA)
ISSoW – Own Isolations (OI)
ISSoW – Permit Holder (PH)
ISSoW – Process Mechanical Isolation Authority (PMIA)
ISSoW – Restricted Permit Holder Shutdown (RPHS)
ISSoW – Vendor Own Isolations (VOI)
Operate Breathing Apparatus
Operate Offshore Cranes
Original Equipment Manufacturer (OEM) Authorisation/ Certificate
Provide Cardiopulmonary Resuscitation
Provide First Aid
Working At Heights
