Project counts inaccurate	3

Enhancement

Subscription dates displayed in invoice

We are pleased to announce a valuable enhancement to your subscription experience. Your subscription invoice now includes clear details about the start and end dates of your subscription.

Subscriptions will continue to be automatically renewed for your convenience.

With this new feature, you can effortlessly keep track of your subscription duration within your calendar. This information proves to be extremely beneficial for budgeting and financial planning purposes, allowing you to forecast expenses more effectively by providing greater transparency.

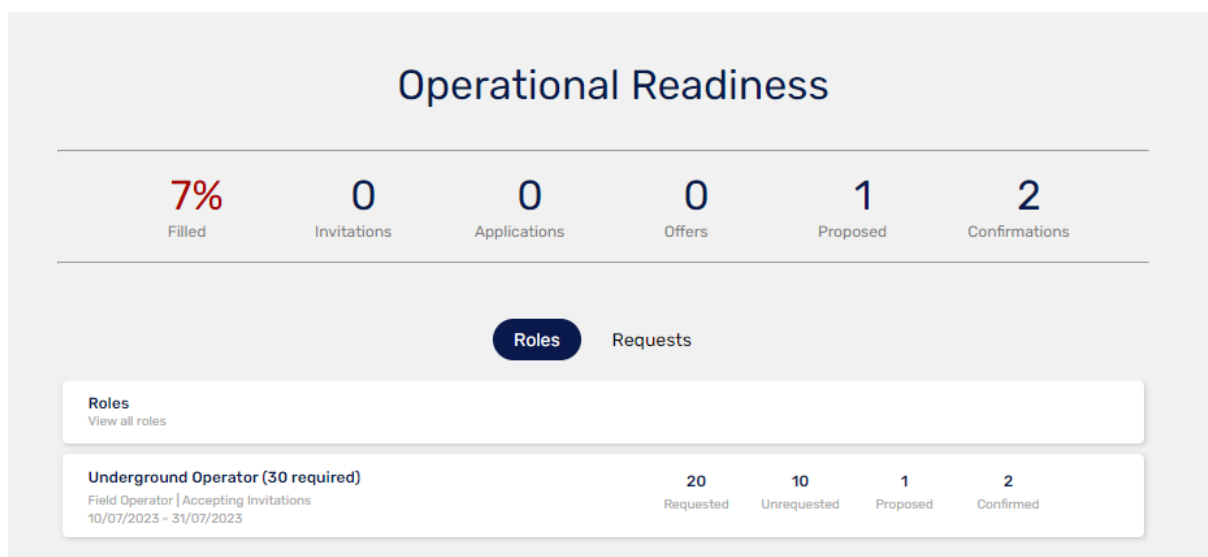

Bug fixes

Project counts inaccurate

MyPass provides an overview of the number of personnel assigned to each stage of a project, which helps in understanding role fulfillment.

Previously, the counts included archived roles, leading to inaccuracies in the count of active roles within projects. We have addressed this issue and refined the counting process to provide you with more accurate data.

With this update, only active roles will be taken into account when calculating the counts.

Thanks to Jack Zagar at BHP for raising this issue.
