Contact MyPass to become an enterprise level Business Partner	3
<b>Bug Fixes</b>	<b>3</b>
Certificate group incorrectly showing compliance	3

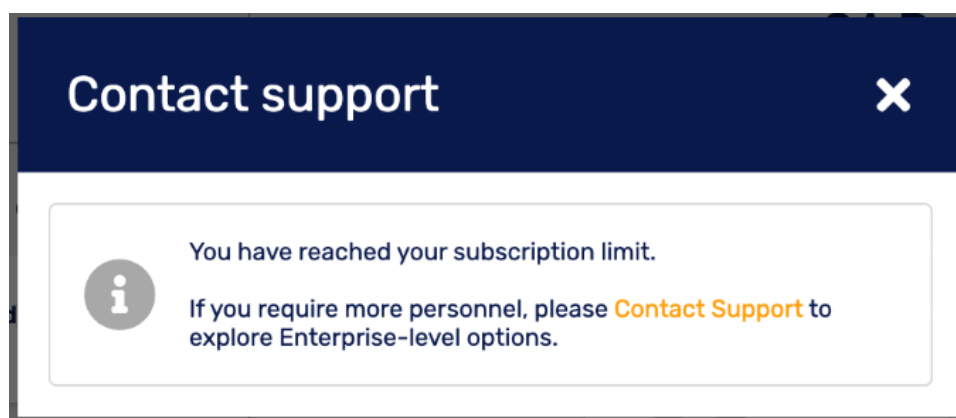

## Enhancement

### Contact MyPass to become an enterprise level Business Partner

The MyPass subscription model enables Business Partners to select from a tier of personnel. The maximum number of personnel that can be selected via the tiered model is 499, with 500 being considered an Enterprise level client.

The MyPass subscription model allows Business Partners to choose from different personnel tiers. The tiered model has a maximum limit of 499 personnel, and any selection beyond this point designates the client as an Enterprise level client, starting at 500 personnel.

In order to accommodate any personnel increases beyond the 499 limit, Business Partners are kindly requested to reach out to MyPass directly. To streamline this process, the application will now display a notification indicating that the subscription limit has been reached and prompt users to contact our dedicated support team at [support@mypassglobal.com](mailto:support@mypassglobal.com) for assistance.

## Bug Fixes

### Certificate group incorrectly showing compliance

Within MyPass, a certificate group encompasses several certificates, and the group's compliance is linked to the condition of either "any" or "all" certificates within the group.

Regrettably, the application overlooked this grouping logic, erroneously presenting the group as compliant even when individual certificates within it did not meet the compliance criteria. This issue has been identified and addressed to ensure accurate representation of compliance status within certificate groups.

*Many thanks to Andrea at Beach Energy for raising this issue.*
