## Enhancements

### Enforce Unique Asset Codes

When creating or editing an Asset, we now ensure that Asset Codes are unique. It is no longer possible to save an Asset if the Asset Code already exists.

### General Technical Improvements

We're working hard in the background on a series of new product features. In the meantime, we've made some general technical improvements to tidy up our code and improve stability.

## Fixes

### Minor Bug Fixes

We fixed some minor bugs that were found internally but not reported by customers.
