Enhancements

MyPass Insights, now in the Industry Portal

We're pleased to bring MyPass Insights directly into the Industry Portal. Your Insights dashboards now sit alongside the rest of your MyPass workspace, so you can move from day-to-day compliance management to reporting and analysis in one place.

Until now, Insights users signed in through a separate login to view their dashboards. With this release, access is managed through your existing Industry Portal account and user groups. This makes it simpler to give more of your team access to the reporting they need, and simpler for administrators to manage who sees what.

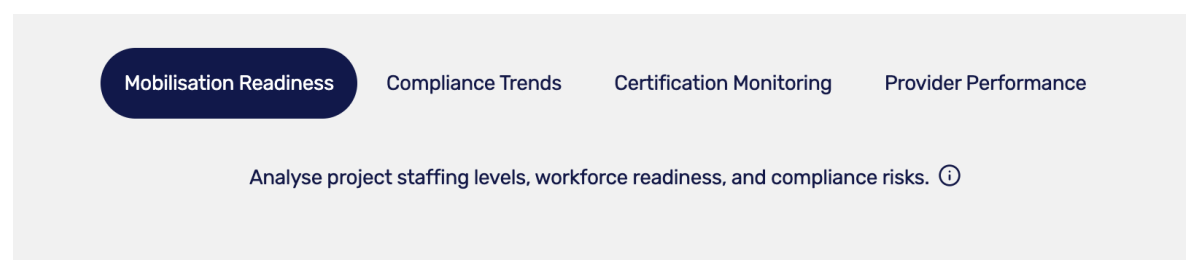

Four dashboards

MyPass Insights includes four dashboards, each built around a different question your team asks about its workforce.

Every table in the dashboards can be downloaded as a CSV, PNG or PDF, so you can take the data into your own reports or share a snapshot with your team.

Mobilisation Readiness

Mobilisation Readiness helps you analyse project staffing levels, workforce readiness and compliance risks. Use it to check that teams are safely and efficiently staffed before they arrive on site.

The dashboard brings together compliance by project, certifications expiring in the next 30, 60 and 90 days, your monthly engagement pipeline, and role fill rates for each project. Everything is shown as totals and percentages, which makes it well suited to client reporting and bid submissions.

Compliance Trends

Compliance Trends lets you track compliance over time or view it as at any historical date. It connects proactive daily monitoring with retrospective verification, so managers have the detail they need to act early.

You can follow compliance week on week by project and by individual personnel, and see which role types carry the most risk. The point in time view lets you pick a past date and see compliance exactly as it stood on that day, which is useful for audits, incident reviews and quarterly business reviews.

Certification Monitoring

Mobilisation Readiness
Compliance Trends
Certification Monitoring
Provider Performance

Monitor personnel certifications, verifications, and upcoming expirations. ⓘ

Certification Monitoring helps you keep track of personnel certifications, verifications and upcoming expirations. Use it to assess workforce capability across your resource pools and prioritise training bookings.

Search by certification name or code to see everyone who holds it, along with their current status and expiry date.

Provider Performance

Mobilisation Readiness
Compliance Trends
Certification Monitoring
Provider Performance

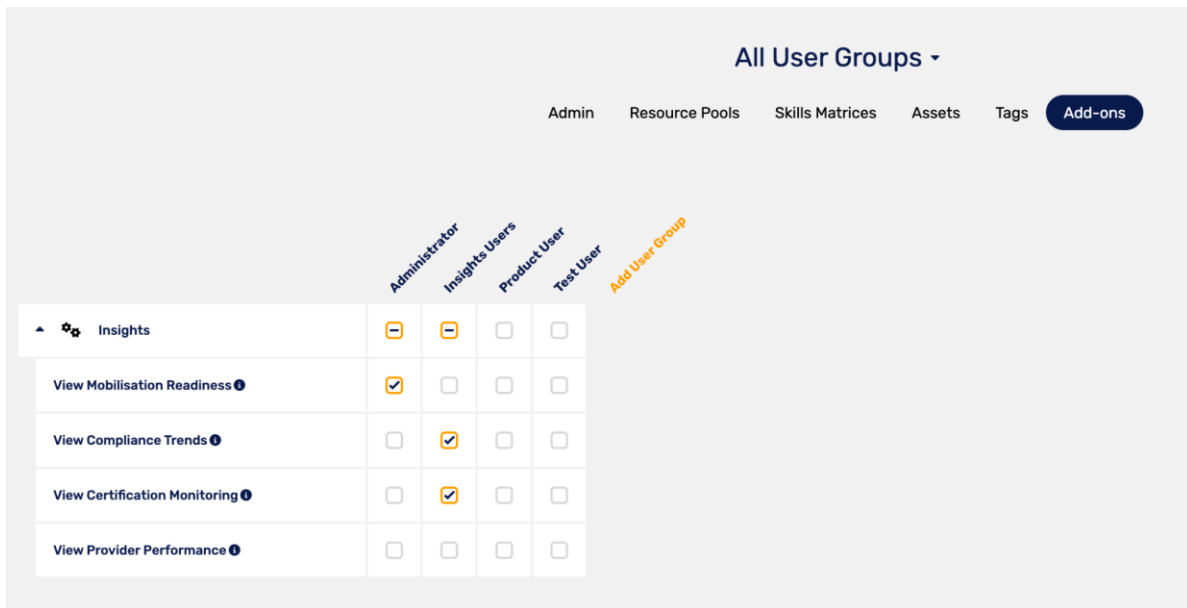

Compare Service Provider mobilisation, compliance, confirmation and response times. ⓘ

Provider Performance compares Service Providers on mobilisation, compliance, confirmation rates and response times. Use it to identify preferred providers and make informed decisions about who to work with on future engagements.

Access and permissions

MyPass Insights is a paid add-on. Each dashboard is enabled for your organisation individually, so you can start with the dashboards that matter most to you and add others later.

Once a dashboard is enabled, your administrators decide which user groups can see it. Each of the four dashboards has its own permission, which means you can give your compliance team access to Compliance Trends and Certification Monitoring while your operations leads see Mobilisation Readiness and Provider Performance.

Getting started

If your organisation already subscribes to MyPass Insights, your dashboards will appear under Insights in the Industry Portal once your administrator has assigned the relevant permissions to your user group.

Compliance Dashboard: Share Anonymised Workforce Data to Win Work

The Compliance Dashboard lets you share live compliance reports with clients through a secure link, with no spreadsheets needed. It first launched in

version 3.253, 25 August 2026. This release gives you more control over what you share and who sees it.

Choose whether personnel names and email addresses are hidden or visible to external viewers. Your bid and commercial teams can show prospective clients the compliance and capability of your workforce without exposing individual names.

Share dashboard ✕

Expires on
30/10/2026 
Access ends at 11:59 pm (AWST) on 30 Oct 2026

External email addresses
Type an email and press enter
thodge@mypassglobal.com ✕

Confirm visibility of personal information
Choose which personal information fields are visible to external recipients. Your own view is unchanged.

Personnel name Redacted when hidden	Hidden ☐
Email address Removed when hidden	Visible ☒

Message (Optional)
Add a message for the recipient...

By sharing, you confirm you have the necessary consents to share this information with external parties.

Share

Clearer Mandatory and Desired Requirements

Mandatory requirements are now marked with an asterisk, and a legend explains the markings.

Compliance Dashboard: Activity Log and Manage Access

Activity Log

See who has shared and viewed dashboards. The log shows who shared each dashboard, who received it, who has viewed it, and when access expires.

Compliance Dashboard / Manage Activity / **Shutdown - August** Project 30 Aug - 15 Sep 2026 Revoke all access Status **EXPIRED**

Activity log Manage access

Automatic Personnel Matching for the Damstra (Ideagen) LMS

Integration

Getting personnel connected to the Damstra (Ideagen) LMS integration is now much faster. Previously, each person had to be onboarded manually by MyPass before their Damstra certificates would start syncing. Now, when the email address on a person's Damstra record matches the one in MyPass, they are matched automatically and their new Damstra certificates sync to MyPass without any manual setup.

Consumers of this integration should ensure that email addresses match in both systems.
